CAREER OBJECTIVE

Front-end Developer with proven ability to collaborate effectively and experience at Zuri Chat in creating and maintaining better code base for reusability. Capable of learning from senior developers while helping junior developers grow. Passionate about learning new skills and technologies while building and improving on already acquired skill sets.

WORK EXPERIENCE

Front-End Developer

Zuri Chat

Aug 2021 – Present / Remote

- Converting Figma designs to interactive and responsive user interfaces
- Refactored code base for the Company tools plugin

Bank Teller

Fidelity Bank Plc

Mar 2017 – Present

- Oversaw all transaction services, including bank deposits, monetary withdrawals, financial transfers, handling an average of N12,000,000 daily
- Consistently met service quality targets maintaining in-depth knowledge of bank products, services and best practices
- Maximized customer satisfaction, educating customers on options for managing financial transactions by leveraging technology, tools and resources.
- Responded and assisted customers with account inquiries and updates

Front-End Developer

HNG-Internship

Aug 2021 – October 2021

- Implemented pixel perfect design for the Zuri Chat Company files plugin pages.
- Implemented file/folder access management to restrict and give access to users depending on their access levels.
- Implemented the landing page for the Figma tool in the Zuri Chat external tools plugin.
- Collaborated with team members to convert plugin built with ReactJS to a Single SPA compatible app.

Front-End Developer

Zuri / Ingressive For Good

Mar 2021 – June 2021

- Converting Figma designs to responsive user interfaces.
- Led Front-end team to develop BloodHQ app, which allows users (Med Labs and Hospitals) to easily find blood match from nearby locations and make orders.
- Implemented the Landing page, user's dashboard, inventory, cart, and checkout page for the BloodHQ page.
- All endpoint integrations including user authentication {sign up and login} and flutterwave payment gateway integration on the front-end.
